

WHEEL STEP Instruction Manual

NO. AA-07624

Stepping Plate

Securing Chain

Hook

Vertical Tube

Steps :

- (1) Measure the size of the tire, then fix the securing chain(B) on the hook at good length.
- (2) Refer to the picture as shown and hang the securing chain on the tire, adjust the stepping plate (A) so it's parallel to the ground.
- (3) Two vertical tubes (D) should attach to the wall of the tire flatly.
- (4) Test with one foot before stepping on the wheel step, make sure the whole wheel step is solid and stable, the chain and the hook must be secured well.

Warning:

- (1) Before installing the wheel step, make sure braking the car.
- (2) Before driving the vehicle, make sure taking away the wheel step.
- (3) The maximum weight capacity is 100 KG(including the wheel step weight). Over loading may be dangerous.
