

# How to set up your pet's new crate

## Step 1:

Lay the crate flat on the floor. Release the side clips (2) used to keep the crate in the folded position. Gently pull the front and back panels of the crate to the vertical position.

## Steps 2 & 3:

Stand to one side of the crate and grasp the 2 piece top bar with both hands. Gradually pull the 2 bars upward so that they join each other. BE CAREFUL NOT TO PINCH YOUR HAND AT THE CONNECTION POINT. Slide the closure sleeve over the connection until it is fully extended and frame is rigid. Repeat the same process for the other side.

Door Locked

Door Open and Secured

## Smart Advice:

Your new crate includes two important features designed for your pet's safety. When your pet is in its crate with the door closed, always lock the door. When your pet is allowed to use the crate with the door open, always roll the mesh door up and fasten with the velcro strap provided as shown.
