## Installation

1. Begin by covering any sharp edges with towels or cardboard to prevent tearing the cover.
2. Remove the cover from the storage bag and unroll it. Locate the front of the cover, identifiable by a tag sewn into the underside of the cover. Drape the front of the cover over the front of the PWC.
3. If using support poles (not included), position the poles before proceeding to step 4.
4. Pull the cover over the entire PWC, pulling the sides below the rub rail.
5. Adjust cover fit by pulling the cover tight to eliminate sagging areas. Such areas may collect standing water or snow, shortening the life of the cover.
6. Tie down straps are included with the cover. Each strap attaches to buckles on the bottom edge of the cover. Attach one end of the strap to the buckle, then run the strap under the PWC and attach it to the corresponding buckle on the other side. Make sure each strap is even and snug.
