

Support Stand Installation Instructions

Step 1:

Set up ramp to desired location.

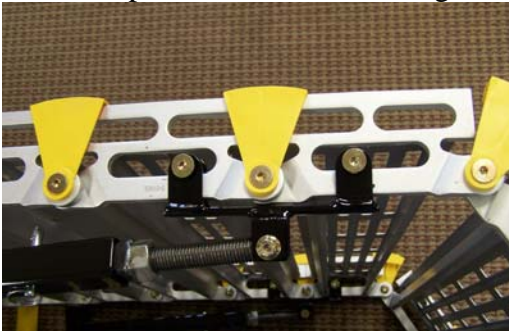

Step 2:

Place support stands under ramp at midway point (or every 6 - 8 ft) and adjust height so that support stands are same height as ramp.

Step 3:

Place ramp bracket onto the railing on the bottom of the ramp spanning between 2 links.

Step 4:

Tighten bolts for secure placement and adjust height with adjustment pins & fine adjustment threads. Then use your new ramp system is ready to use.
